

# Cherry Red

## About the Book:

When a series of unusual carbon monoxide poisonings hit Seattle, former college roommates Dr. Bradley Franklin and police detective Robert Heimbigner team up in an effort to solve the mystery. As the investigation develops, they suspect foul play. Can the old friends uncover the connection between the seemingly unrelated events before more lives are lost?

## Reviews:

“*Cherry Red* is the perfect mix of science, medicine, and suspense. Dr. Hampson’s renowned expertise in the fascinating niche of hyperbaric medicine and carbon monoxide poisoning injects this fast-paced mystery with authentic details as a brilliant doctor untangles one patient’s injury to expose a darker plot. A thoroughly engaging and informative read.”

— Carol Cassella, MD, national bestselling author of *Oxygen*, *Gemini*, and *Healer*

## About the Author:

Dr. Neil Hampson, a Seattle native, is a retired pulmonary, critical care, and hyperbaric medicine physician. He has an international reputation in hyperbaric medicine, specifically in the area of carbon monoxide poisoning. During his clinical career, he treated over 1,000 patients with carbon monoxide poisoning and published numerous papers in medical journals about the condition.
